

MOHAMAD ELBAHDLI

Minyet El-Nasr, Ad Daqahliyah, Egypt | +20 (01028211712) | [LinkedIn](#) | [Website](#)

Professional Summary

Civil Engineer with 1+ year of experience in structural engineering, structural design, and site execution. Skilled in reinforced concrete design, shop drawing review, post-tensioned systems, and construction supervision. Experienced in ETABS, SAFE, SAP2000, Revit, and AutoCAD, with a focus on accurate structural solutions, quality control, and execution compliance.

Professional strengths include:

- Structural Design
- Reinforced Concrete Design
- Structural Analysis
- Post-Tensioned Systems
- Shop Drawing Review
- Site Supervision
- Construction Execution
- Formwork and Reinforcement Inspection
- ETABS
- SAFE
- SAP2000
- Revit
- AutoCAD
- Basic Web Security and Cybersecurity

Experience

FOUDA GROUP – Dekernes, Ad Daqahliyah, Egypt

Structural Design Engineer

17 July 2026 – Present

- Designed and reviewed structural solutions for reinforced concrete buildings using engineering analysis and design software.
- Prepared and coordinated structural drawings, calculations, and shop drawing requirements.
- Verified design accuracy and supported compliance with project specifications.

Kased Khair for General Supplies & Contracting – Talkha, Ad Daqahliyah, Egypt

Site Engineer Trainee

07 Nov 2025 – 20 Dec 2025

- Supervised execution of the eighth-floor reinforced concrete slab for a residential and commercial complex designed with a post-tensioned structural system.
- Inspected formwork, reinforcement layout, cable profiles, ducts, and anchors against structural drawings.
- Supervised concrete pouring operations and enforced site quality-control standards.

Al-Aziz Engineering Office (مكتب العزيز الهندسي) – Mit El-Khouli Moumen, Egypt

Site Engineer Trainee

19 Aug 2025 – 23 Oct 2025

- Supervised execution of the reinforced concrete skeleton for a residential tower comprising a basement, commercial ground floor, and four typical floors, designed with a flat-slab system.
- Managed daily site supervision and inspected excavation, foundations, columns, and associated construction works under Prof. Dr. Mahmoud El-Gamal's consultancy office.
- Inspected formwork and steel reinforcement through the concrete-pouring stage to ensure structural quality and execution compliance.

Education

Bachelor's Degree in Civil Engineering

2020 – 2026

Faculty of Engineering, Mansoura University – Mansoura, Egypt

Graduation Project: Structural Design (Team Leader)

- Designed multi-story buildings using ETABS and SAFE.
- Led a team of two members and managed task distribution.
- Reviewed structural calculations and coordinated analysis, design, and shop drawings.

Certifications

Basic Web Security and Cybersecurity – Self-directed technical development

Structural Design Project – Faculty of Engineering, Mansoura University
